

To all my Mustang family:

I am truly saddened to inform you about the passing of a close friend of MCCNE, Donna Remy. She passed earlier this week from complications of Covid. Donna was an asthma sufferer. She received all shots and boosters for Covid but became infected anyway. She developed pneumonia and then a lung infection. The disease process was just too much for her to handle. She leaves behind her loving husband of 63 years Bob, children, grandchildren and a great grandchild.

When help was needed Donna was the first to step up to help. She was our Treasurer for years. She was a true Mustanger. Roberta and I along with those who knew her will miss her sense of humor, her joyous nature and generosity.

It was Donna's request to not have any kind of service. She will be cremated and just her immediate family will attend the internment.

RIP my good friend,

Jim Silverman
